PROJECTS

JamSphere
GW BOOTCAMP FINAL PROJECT - JUNE 2023
Responsible for creating and implementing the functionality on the front end of the application using JavaScript and React/JSX.
Stylized each component with CSS and Tailwind to create a cohesive and visually appealing UI.
Facilitated group meetings as well as delegated tasks to keep the project moving forward through Zoom and Discord.
Designed and created the Powerpoint slide deck used in the presentation

Personal Portfolio
PERSONAL PROJECT
Designed wireframes using Figma for a strategic visual blueprint.
Developed the entire portfolio from scratch using React.
Integrated advanced features, including animations, for an enhanced user experience using CSS and JavaScript.
Successfully deployed the portfolio using Vercel.

Glory Hounds
FREELANCE WORK - NOVEMBER 2023
Discussed and created a wireframe that included all the elements wanted from the client.
Communicated effectively with clients throughout the entire process via Email.
Developed a multi page React application with contact functionality and slideshow effect on landing page.
